EDUCATION

Bachelor of Computer Applications (BCA)

Shree Devi Institute of Information Science

Final Year · Expected 2027

TECHNICAL SKILLS

Languages
Python, Java, C, SQL, HTML5, CSS3, JavaScript

Frameworks
Django, Flask, REST API, Bootstrap

Databases
PostgreSQL, MySQL, SQLite

Libraries
OpenCV, Pandas, NumPy, TensorFlow, DeepFace, SpeechRecognition, PyAutoGUI

Tools
Git, GitHub, VS Code, Android Studio, Postman, Figma

Platforms
Windows, Linux

SOFT SKILLS

- Problem Solving
- Leadership & Teamwork
- Communication
- Time Management
- Adaptability
- Critical Thinking

LANGUAGES

English, Kannada, Hindi, Tamil

PROFESSIONAL SUMMARY

Motivated final-year BCA student with hands-on experience across Python development, web development, artificial intelligence, and software engineering. Skilled in building intelligent desktop applications, responsive web apps, AI-powered automation tools, and backend systems with Django. Strong problem-solver with a track record of turning ideas into working, demonstrable software.

PROJECTS

AI Voice Assistant | *Python, Speech Recognition, TTS, OpenCV, AI APIs*

- Built an intelligent voice assistant that understands and responds to natural language commands, combining speech recognition, AI, computer vision, and desktop automation.
- Integrated computer vision for real-time object identification via the system camera.
- Enabled hands-free laptop automation — opening applications, web searches, and system control through voice.

AI Healthcare Management System | *Python, Django, Flutter, PostgreSQL*

- Developed a full-stack healthcare platform connecting doctors and patients, with secure JWT authentication.
- Built appointment scheduling, patient management, and REST APIs linking the frontend and backend.
- Added AI-assisted prescription management and automated medicine reminders.

Face Recognition Attendance System | *Python, OpenCV, DeepFace, TensorFlow*

- Built an AI-based attendance system using facial recognition with high tracking accuracy.
- Designed an analytics dashboard for student registration and automated Excel report exports.

Web Development Projects | *HTML, CSS, JavaScript, Python, Django*

- Designed and built responsive, database-driven web applications with secure authentication and CRUD functionality.
- Focused on responsive UI, backend integration, and scalable architecture.

Python Desktop Applications | *Python, APIs, GUI Frameworks*

- Built desktop productivity tools and automation utilities with API integration, database management, and file handling.

CORE STRENGTHS

- Python & Django Development · Artificial Intelligence & Computer Vision
- REST API Development · Database Design
- Desktop Application Development · Object-Oriented Programming
- Debugging & Software Testing · Version Control (Git)

ACHIEVEMENTS

- Built and shipped multiple real-world Python and web development projects independently.
- Developed AI-powered desktop applications leveraging speech recognition and computer vision.
- Actively expands technical skills through hands-on development and continuous learning.

CAREER OBJECTIVE

To begin my career as a Software Developer, applying my knowledge of Python, web development, and artificial intelligence to build innovative, scalable, and user-focused software — while continuously growing my technical skills through challenging, real-world projects.
